

FOG JET PF 0105

DESIGN / APPLICATION DATA:

Aquascape Fog Jet is designed for low wind area. It's not to create great height, but rather large volume making it particularly suitable for architectural fountains .
Please bear in mind that when installed in outdoor fountains, due to the small weight of the droplet, the wind can easily "overflow" the water fountain; therefore, it should not be installed in wind area.

SPECIFICATION DATA:

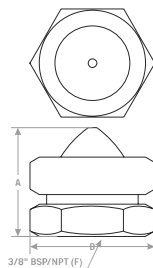

Material of construction is brass with Stainless steel cap

OPERATING DATA:

Noise : Poor
Visibility : Good
Splash : Poor
Wind Stability : Poor
Aeration Quality : Good

PF 0105

3/8" BSP/NPT (F)
